- Screw conveyors
- Vibrating conveyors

- System solution – Sawmill sub floor

- System solution – Board industry

Badr Harmaz– Intercontinental Timber

- Badr Harmaz 43 years old from Västerås
- Law practicing background and wood technician education from Hammarö/ Karlstad (Gamla rikssågsskola).
- Manages own company within wood trading focusing on export to MENA region (Intercontinental Timber i Sverige AB). We offer various sorts of wood from the Nordic countries but also from the US, other European countries and from Africa.
- Experience from other wood exporting companies.
- Has a genuine interest in the forest and participate in events held by Skogsindustrierna and STTF among others.
- Spare time is spent with 3-year-old Gali who also enjoys the forest. 

Wood market Sweden

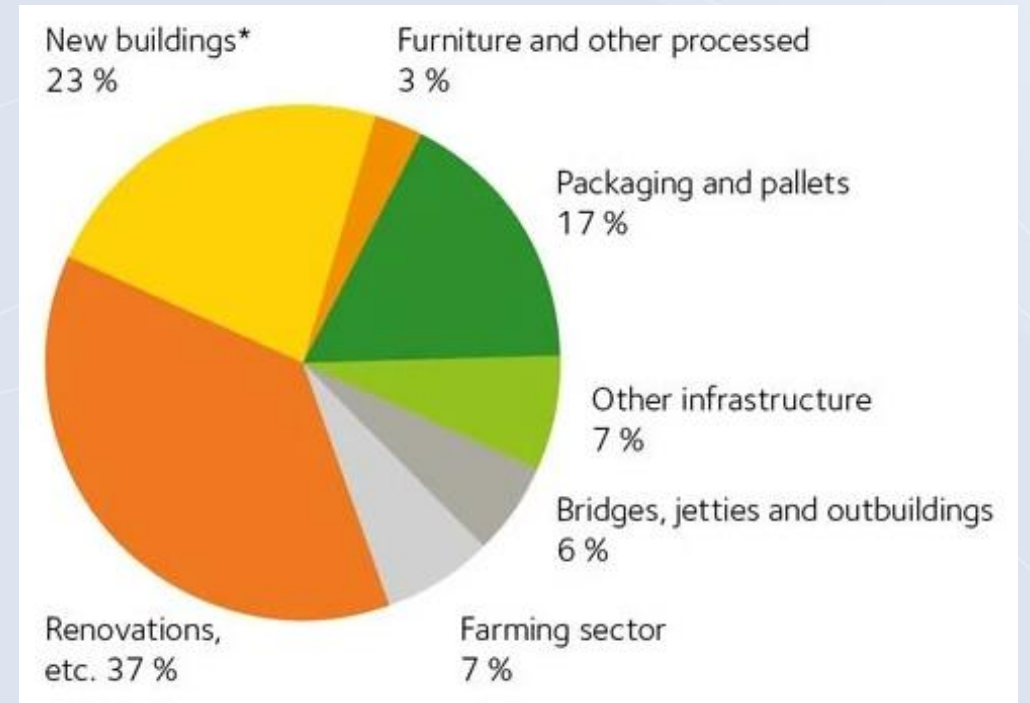

■ Volume

- Sweden has an annual production of 18,6 million m³ sawn timber
- The ten largest companies produce 60%
- The 20 largest companies produce 80%
- 1/3 of the annual production is consumed in Sweden

■ Export

- 2/3 of the sawn timber is being exported

■ End uses wood-based products

Future challenges

- Beetle infestation
 - Will most likely increase due to climate change
 - Research is done investigating reason for increased infestations after warm and dry summers
 - Research is done investigating the most resilient population
- Ukraine
 - Embargos Russia and Belarus affects the market
 - Steel prices highly affected
